About me

Coding and solving problems is not just a career for me, it's a hobby. I started learning foreign languages in highschool and as my love for my technology grew, so did my language learning choices. I am now comfortable programming full stack applications in many languages and my enjoyment of coding increases with each project. I consider myself a life-long learner so if there is something I can't do today, I will take it upon myself to learn by tomorrow.

I look forward to joining an agile team at your organization.

After all, teamwork is the key to success.

Projects / Experience

Software Development Engineer (Analyst) - Deutsche Bank (12/18 - present)

I am the lead front-end and UX developer for a new bank tool which aims to reduce manual tasks for global bank applications through automation and complex "job creation" using tooling like Ansible, Jenkins, and more.

Relevant Skills: React.js, Node.js, Webpack, RedHat Openshift, Java, Spring, RESTful API development and consumption, and more.

UNCC Code - A student portal for coding bootcamps

I served as a member of an agile team to build a student mangement system for bootcamp students. My main roles were back-end developer and React developer.

Relevant Skills: Node.js, Express.js, RESTful APIs, React.js, Context API, State Management, MongoDB, and Agile Methodology

Snippet - A "Twitter-esque" website for coders

As lead back-end developer for Snippet, I handled server-side developement, user authentication, and data management. I also manged the MVC functions with Handlebars and Express.

Relevant Skills: Handlebars, Node.js, Express.js, Data Structures, SQL Databases, CRUD Operations, ORMs, and User Authentication.

Skills

Languages

JavaScript / Node.js

Python

Java

Front-End

HTML / CSS / Sass

React.js / JSX

Handlebars

jQuery

Back-End

Node.js

Express.js

Java (Spring / Spring Boot)

MongoDB (Mongoose)

MySQL (Sequelize)

Automation

Maven, Jenkins, Ansible

SAFe DevOps Certified

Testing

Jest, Mocha.js, and Chai

Tools and Practices

RESTful API Development

CRUD Operations

Model-View Controllers

Git (Version Control)

Agile and Test Driven Development

User Authentication and Encryption

Education

Agile Training

SAFe, DevOps Certified

Full Stack Web-Development Bootcamp
